

COMPANY PROFILE

FCS are wholesalers and project suppliers, and operate accross three different branches (Bloemfontein, Upington and Gauteng) and offer a comprehensive range of fluid control products.

Our products conform to national and international quality standards. Our extensive product portfolio enables us to provide our customers with comprehensive packages of products for various applications.

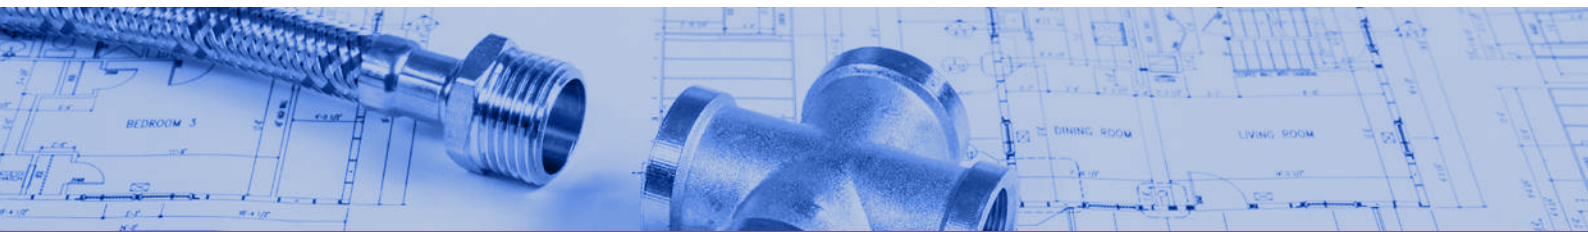

Mission Statement

- FCS Group will at all times strive to provide quality products and world class service.
- Through professional and knowledgeable staff (collectively more than 250 years industry knowledge) we will give sound and responsible advice and we will endeavor to become the supplier of choice for our market.
- We will nurture, build and constantly improve our relationship / partnership with our suppliers across the world and will never take their input to our success for granted.
- We will value our staff, treat them with the same respect and dignity we demand, and we will constantly help them to grow and improve.

Our Target Markets

Mainly wholesalers and project suppliers in the following markets:

	Civil Engineering
	Building
	Agriculture
	Air Conditioning
	Fire Control
	Plumbing
	Mining

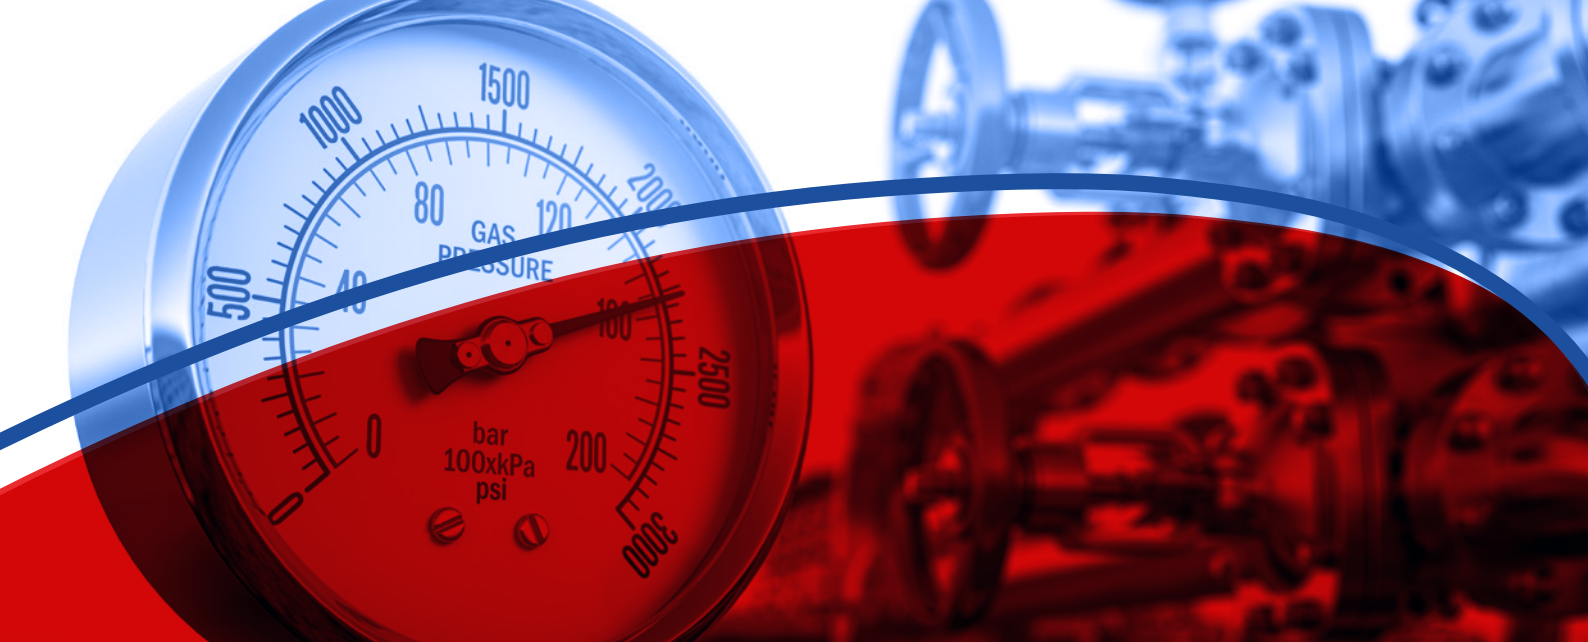

Our Standard of Conduct

We are acutely aware of the fact that a number of competent competitors are active in our market.

In order to become the supplier of choice for our market, we will:

- Live up to our mission statement.
- Remain competitive.
- Never compromise on the quality of our products and our customer service, trade responsibly, and honour our commitments.

The industry, The company and Future opportunities

Our current objective for the company is to serve the Free State, Northern Cape, Gauteng, Lesotho and neighbouring regions.

We have positioned ourselves to trade in a growth industry for the following reasons:

- The legacy of South Africa prior to the new democracy excluded the majority of the population from basic services.
- A large number of areas in our country are still in dire need of basic services.
- A lack of maintenance resulting in the deterioration of older services.
- The influx of the rural population into urban areas.
- The demands and expectations that have reached critical levels in many areas.
- New developments and better facilities that is urgently required.
- The government's program to satisfy the constitutional right of citizens.
- The development of first world facilities will follow and create a demand for a much wider range of fluid conveyance products and services.

We are in an industry that is developing rapidly. FCS Group might, via responsible business decisions and strategic planning, establish other branches in the Republic of South Africa and neighbouring countries.

Products

Our products are mainly aimed at the targeted use of water, sewer, storm water, steam, gas and petrochemical applications.

01 Brass

Fittings, Valves, Taps / Mixers, Couplings & Water Meters.

02 Copper

Fittings & Tubes.

03 Stainless Steel

Fittings, Clamps, Saddles, Fabrications, Bolts, Nuts & Sinks / Wash troughs.

04 Steel / Iron / Malleable Cast

Pipes, Tube, Fittings, Valves, Flanges, Couplings, Fabrications, JIS Fittings, Wrought Steel & Malleable Cast fittings.

05 Cast Iron

Pipes, Fittings, Valves (Flanged, Plain Ended, Wafer, Socketed, Grooved & Shouldered), Couplings, Manhole Covers, Valve & Meter Boxes.

06 Ductile Iron

Pipes, Fittings, Couplings, Saddles, Manhole Covers, Valve & Meter Boxes.

07 Cement

Fittings & Channels.

08 Concrete

Pipes, Channels, Manhole Rings, Lids & Cover Slabs.

09 Polymer Concrete

Manhole Covers-Valve & Meter Boxes.

10 Rubber

Hoses, Delivery & Suction.

11 Nylon

Fittings.

12 Plastic

Valve Boxes, Meter Boxes, Water Tanks, Septic Tanks, Toilet Seats, Toilet Cisterns & Water Meters.

13 HDPE - High Density Polyethylene

Pipes-Fabricated Fittings, Flanges, Electro-fusion & Manholes to spec.

14 LDPE - Low Density Polyethylene

Pipes.

15 Polyethylene

Pipes, Fittings, Valves, Flanges, Couplings, Saddles & Electro-fusion.

16 GRP - Glass(fiber) Reinforced Plastic

Pipes & Fittings.

17 PVC - Polyvinyl Chloride (Un-plasticised & Modified)

Pipes, Ducting, Fittings, Valves, Flanges, Couplings & Fabrications.

18 Other

Blanket Material, Draw Wire, Road Barriers, Gabions-Mattresses, Testing Machines & Plugs (Water and Air).
